Personal Projects

◆ *UGoOnTravel* → A Website for Travelers

[Live Website](#) | [Client-Side Code](#) | [Server-Side Code](#)

Technology Used: HTML5, CSS3, Bootstrap, Javascript, React, NodeJs, ExpressJs, Mongoddb, React-Router-Dom, React Bootstrap, React-Hook-Form, React-Router-Hash-Link, React-Images-Upload, MomentJs, Sweetalert2, Axios.

Features

- It's a Full Responsive MERN website containing

hotel/resort-related info and travel-related tips & tricks.

- Users can log in/signup to this website as well as they can book for any hotel/resort. Also Implement a private route so that if the user is not logged in, the private route will redirect him to the login page.
- A customized Admin route exists, where the admin can add & manage all packages associated with bookings. He can also make someone an admin. (Mainly CRUD operations)

◆ *Luxury Time* → A Niche website

[Live Website](#) | [Client-Side Code](#) | [Server-Side Code](#)

Technology Used: HTML5, CSS3, Bootstrap, Javascript, React, NodeJs, ExpressJs, Mongoddb, React-Router-Dom, React-Hook-Form, React-Router-Hash-Link, React-Images-Upload, Material-UI, Styled Components, Sweetalert2.

Features

- It's a MERN stack niche website containing varieties of watches.
- For purchasing luxurious watches, a user must log in/sign up to this website. There is a dashboard where any user can see their ordered products. And they can give ratings and reviews also.
- Users can mail here for any interrogations. They can subscribe to this website in order to get new arrivals, promotions, and discounts.
- There's also an Admin dashboard where an admin can add, manage all orders & products and make someone an admin.

◆ *Trusmile* → A Dental website

[Live Website](#) | [Code Link](#)

Technology Used: HTML5, CSS3, Javascript, React, React-Router-Dom, React Bootstrap, Firebase, React Router Hash Link, React CountUp

Features

- It's a dentistry-related website with a great combination of UI and animation.
- Users can know about our services, facilities, and treatments. And they can request an appointment through the mail.
- Also used a google map and set up dynamic routing.
